## BB-2

### Fixed Practice Basketball Unit

#### WALL BRACKETS AND FRAME

- The wall brackets are constructed of 1/4" (6.35 mm) thick angles 2" leg x 2" leg (51 mm X 51 mm) and 39" (991 mm) in length, with (3) three mounting slots. The extensions of 1/8" (3 mm) wall, 2" (51 mm) square E.R.W. (Electric Resistance Welded) HSS tubing with a custom length to establish basketball backboard extensions are welded to the formed channel construction. These extensions are part of the constructed framework, which is welded to steel front board holders. This unit slides in a vertical motion on 1/8" (3 mm) wall x 2" (51 mm) square HSS tube allowing the BB-2 to adjust for a goal height of between (10'-0") and (8'-0") (3048mm to 2438mm). ASTM-G40.17 GRADE 50, or A-500 TYPE B material shall be used for frame, channel and extensions. All hardware is of Grade #5 quality.

#### SUPPORT

- The top and bottom frame of the backstop shall be supported by (3) three through wall anchors; 18" (457 mm) in length or (3) three Hilt HY-20 epoxy anchors on each wall bracket, and installed to Hilti specifications using Hilti anchors.

#### GOAL

- The goal shall be directly mounted through the bank and onto steel board holders. This eliminates any strain on the bank should a player hang on the front of a mounted goal.

#### OPERATION

- This is a fixed practice type basketball unit. It comes with a height adjustable frame (10'-0") to (8'-0") (3048mm to 2438mm) goal height adjustment. A crank handle is supplied in order to raise and lower the height adjustable frame.

#### FINISH

- All metal parts shall be painted with one (1) coat of standard black rust-inhibitive enamel. Custom colors are available where required upon request.

#### WARRANTY

- There is a limited Warranty of two (2) years on all basketball equipment.
